CARMELITA MARTIN

TWINBROOK FARM

(WORTHINGTON)

RINGVILLE, P. O.

MASS.

Dec 25. 22

Dear Clarke: Thanks for yours
about the medal. It is a very
interesting question, but I must
proudly confess that to my humble
way of thinking, it was never
intended to exclude central
station engineers - or engineers
such as John Carty, who already
has it - certainly not because
he is a great scientist, a great
inventor, a great physicist.
But because he is a great central
station engineer in the telephone
field. - that and nothing else

I am going to good old
England in a week or two for

a brief look in - and back again
soon for a ~~lot~~ lot of other work
that must be promptly cleaned
up.

We are spending our Xmas
at the farm - 15 in of snow on
the ground, ~~with~~ ^{while} there are three
cog fires going, and we have our
own big tree out of the woods
with greens and berries - and the
youngsters are getting lots of
skiing, skating, sleighing
and a little shooting.

With regards and best
wishes for 1923, a sever

Yours very truly

T. Quastner
